## Operations & Customer Experience Executive | Global SaaS Scaling | 24/7 Mission-Critical Ops

Operations executive with **20+ years** scaling mission-critical **SaaS, cybersecurity, and fintech** companies across Israel, the US, and 5 additional countries. Built **24/7 operational organizations from scratch** serving **Fortune 100 customers**, owned **multi-million-dollar operational budgets** in partnership with CFOs, and integrated **post-acquisition operations** into unified global models. Combines process-engineering rigor with **AI-augmented workflow design** — replacing manual operations with scalable systems while treating customer experience as an operational responsibility.

0 → 1 org builds

TTR 48h → 6h

FCR ~75%

Industry ranking #7 → #1

NOC scaled 6 → 20+ engineers

Budget multi-million \$

Fortune 100 enterprise trust

ISO 27001 governance

7 countries · 100+ people led

### Professional Experience

#### MoovingOn

Jun 2023 – Mar 2026

AI-driven SaaS — mission-critical 24/7 environments

#### VP Operations

Jun 2023 – Mar 2026

Owned operational budget in partnership with CFO. Led NOC (1 TL + 20–25 engineers) and Customer Success (3 CSMs). Cross-border execution across Israel and US.

- Transformed operations from reactive support into structured, measurable, growth-aligned infrastructure — including KPI dashboards integrating SLA, incident, and escalation analytics
- Owned **multi-million-dollar operational budget**; co-led forecasting, planning, and cost optimization with CFO
- Built and scaled **24/7 NOC** supporting mission-critical SaaS environments
- Established **Account Management function from scratch** to support retention and expansion revenue
- Introduced structured RCA methodologies, reducing recurring incidents and strengthening customer confidence
- Led **ISO 27001 governance and audit-readiness** program across the organization
- Partnered with VP Sales on pricing strategy, commercial processes, and deal acceleration

### Core Capabilities

#### Operational Scaling

0 → 1 ops build, 24/7 mission-critical SaaS, post-acquisition integration

#### Global Team Leadership

Distributed teams across 7 countries; cross-border alignment Israel + US

#### Customer Operations

Support, CS, Onboarding, Escalation, AM — Fortune 100 customers

#### Budget & CFO Partnership

Multi-million budgets, forecasting, cost optimization

#### KPI & Governance

SLA frameworks, escalation metrics, executive dashboards

#### AI & Automation

AI-assisted triage, automated reporting, scalable workflow redesign

#### Compliance & Risk

ISO 27001 governance, audit readiness, enterprise frameworks

## Radware

Feb 2022 – Jun 2023

Public cybersecurity company (cloud security, application delivery) — enterprise, banking, healthcare, government customers

### Cloud Network Group Leader

Feb 2022 – Jun 2023

~40+ engineers across NOC (TL + Professional Lead + 25–30 engineers), Network Experts (TL + 7), and Escalation Team (TL + 3). 4 regions: Israel, US, India + additional.

- Reduced **TTR from ~48 hours → ~6 hours** through operational restructuring, escalation governance, and knowledge enablement
- Increased **First Contact Resolution to ~75%**, transforming the NOC into a high-capability operational response organization
- Contributed to improving **industry service ranking from 7th → 1st**, including positive positioning in Forrester Research evaluations
- **Integrated multiple acquired operational units** into a unified global follow-the-sun operating model post-acquisition
- Built structured onboarding and training frameworks replacing informal shadow-learning with formal enablement programs
- Led executive-level communication during critical banking incidents, preserving strategic customer relationships through operational accountability and trust recovery

## SecurityDAM

Jan 2020 – Feb 2022

Cybersecurity SaaS — security-sensitive, high-growth (acquired by Radware)

### Head of Support

Jan 2020 – Feb 2022

Built from scratch. 22 direct reports across NOC / Global Support, Israel and US.

- Scaled global 24/7 support organization from **6 → 20+ engineers**, serving Fortune 100 enterprise customers
- Shifted culture from product-centric to customer-centric operations; designed recruiting, onboarding, training, certification, and runbook governance systems
- Designed **KPI frameworks** enabling data-driven management, forecasting, and proactive performance optimization
- Built scalable operational infrastructure directly enabling the company's path to **acquisition by Radware**

## XSites

Jan 2016 – Dec 2019

Technology company with multi-region operations

### COO

Jan 2016 – Dec 2019

Support Tier 1 (TL + 7 Agents, Cyprus/Serbia), Tier 2 (TL + 3 Engineers, Cyprus/Serbia), Customer Success (TL + 3 CSMs, Israel), Onboarding (2 Specialists, Israel).

- Led company-wide operations across Support, Onboarding, and Customer Success — designed scalable customer lifecycle models improving visibility and accountability
- Implemented **KPI governance and performance analytics** across the organization; aligned Product, Sales, and Operations around execution priorities
- Built organizational structure, hiring strategy, talent acquisition, and employee lifecycle management to support scaling

## Education

### Computer Science & Mathematics

The Academic College of Tel-Aviv, Yaffo

2000 – 2003

## Languages

Hebrew — Native speaker

English — Full proficiency

## Early Career 2000 – 2016

Varonis — QA Leadership

Cybersecurity · Quality engineering

Personetics — QA Leadership

Fintech · Automation · Release governance

TechFinancials — QA Leadership

Fintech · Process standardization

Monosphere — QA Leadership

Quality engineering systems
