Operations & Customer Experience Executive | Strategic Impact Metrics

Executive Leadership Profile

Senior Operations & Customer Experience Executive specializing in building and scaling mission-critical operational organizations, improving SLA performance, and transforming customer-facing operations into measurable, highly accountable, and scalable business functions. Experienced in leading global 24/7 environments supporting enterprise customers, financial institutions, healthcare organizations, and government entities — where operational reliability directly impacts business continuity, customer trust, and revenue protection.

Strategic Impact Areas & Operational Outcomes

Impact Area	Operational Leadership Focus	Measurable Business Outcome
Operational Scalability	Built and scaled operational organizations, onboarding systems, escalation governance, and knowledge infrastructures	Scaled NOC organizations from 6 → 20+ engineers while improving service quality and operational maturity
SLA & Resolution Performance	Introduced operational restructuring, knowledge enablement, and escalation management processes	Reduced average TTR from ~48 hours → ~6 hours
First Contact Resolution	Expanded NOC ownership and operational capabilities	Increased FCR capabilities to ~75%
Customer Experience Transformation	Shifted organizations from product-centric to customer-centric operational models	Improved customer satisfaction, operational professionalism, and service reliability
Operational Visibility & Governance	Designed KPI dashboards and operational analytics systems	Improved visibility into response times, escalation patterns, runbook coverage, shift quality, and workforce maturity
Knowledge & Workforce Management	Built continuous operational assessment and enablement frameworks	Enabled proactive identification and closure of organizational knowledge gaps
Executive Escalation Management	Led critical customer communications during high-impact operational incidents	Preserved strategic customer relationships and prevented contract loss during severe service-impact events
Service Reputation Improvement	Led operational and customer service transformation initiatives	Improved global service ranking from #7 → #1 in industry comparison
Cross-Functional Alignment	Aligned Product, Engineering, Operations, and Customer teams around customer commitments and delivery expectations	Improved execution discipline, operational accountability, and customer trust

Global DDoS Operations Transformation Radware

OPERATIONAL CHALLENGE

The operational environment supported highly sensitive global customers including banks, governments, healthcare organizations, enterprise customers, and mission-critical internet infrastructure. The existing NOC organization handled only low-level tasks, lacked operational maturity, and operated with limited escalation ownership and knowledge management capabilities.

LEADERSHIP ACTIONS

- Expanded operational ownership across the NOC organization
- Built structured onboarding and enablement programs
- Implemented operational governance and escalation management frameworks
- Selected and deployed operational management systems and knowledge-base infrastructures
- Expanded operational engineering responsibilities into customer onboarding and stress-testing activities

STRATEGIC OUTCOMES

- Increased First Contact Resolution (FCR) to approximately **75%**
- Reduced Time-to-Resolution (TTR) from approximately **48 hours** → **6 hours**
- Contributed to improving industry service ranking from **7th place** → **1st place**
- Supported positive positioning in Forrester™ Research evaluations

Customer-Centric Operational Leadership SecurityDAM

OPERATIONAL CHALLENGE

The organization operated primarily through product and engineering priorities with limited operational governance and weak customer-service culture. Customer dissatisfaction and operational inconsistency were recurring challenges.

LEADERSHIP ACTIONS

- Shifted operational focus toward customer-centric service delivery
- Built and scaled the NOC and support organization from **6** → **20+ operational professionals**
- Designed structured recruiting methodologies, onboarding frameworks, training programs, certification systems, and knowledge-governance infrastructures
- Created continuous operational competency assessment systems with automated testing and gap analysis

STRATEGIC OUTCOMES

- Significant improvements in customer satisfaction, SLA performance, operational professionalism, team maturity, and service quality
- Improved operational visibility and workforce accountability
- Supported continuous month-over-month customer growth
- Elevated NPS and customer trust across the organization

Operational Visibility & KPI Governance

MoovingOn

OPERATIONAL CHALLENGE

Operational performance lacked measurable visibility both internally and externally, limiting proactive management, accountability, and customer transparency.

LEADERSHIP ACTIONS

- Designed and implemented customer-facing and internal operational KPI dashboards
- Partnered with development teams to create operational analytics systems
- Introduced automated customer reporting and operational visibility frameworks
- Built governance around response times, escalation patterns, runbook coverage, workforce quality, and shift performance

STRATEGIC OUTCOMES

- Enabled proactive operational improvement initiatives
- Identified operational bottlenecks and workforce quality gaps
- Reduced unnecessary escalations
- Improved operational accountability and customer transparency

Crisis Leadership & Executive Communication

Demonstrated leadership during high-pressure operational incidents involving critical financial-sector customers and severe service-impact events.

KEY RESPONSIBILITIES

- Coordinating technical response efforts
- Managing executive-level customer communications
- Driving operational prioritization
- Overseeing resolution validation
- Leading post-incident trust recovery

OUTCOMES ACHIEVED

- Transparent communication throughout
- Timely executive updates at every stage
- Full operational accountability maintained
- Strategic customer relationships preserved
- Structured follow-through on all commitments

Visibility-Driven Mgmt

Continuous Improvement

Execution Accountability

Repeatedly recognized by executive leadership for creating operational environments where commitments are kept, escalations are contained, visibility is maintained, operational standards continuously improve, and leadership teams can confidently focus on broader organizational priorities knowing operational execution is fully managed.
